On Item 5(b) Continental Plaza, 7300 Westown Parkway - Rezone approx. 1.08 acres from Professional Commerce Park to Support Commercial, initiated by Penta Partners, LLC

Lynne Twedt, Development Services Director, reported that after the first reading on this proposed rezoning, Knapp Properties has inquired about adding support commercial to their adjacent property to the east at 7100 Westown Parkway. She stated staff would need to complete a traffic study, but if there are no traffic issues, staff would likely recommend rezoning the entire frontage of the Penta Partners property to support commercial as well, so the zoning would be consistent all the way across. She reported staff has also discussed with Knapp Properties the cross access requirement, which can be a simple parking lot connection and does not need to be a frontage road, and a potential future traffic signal at 71<sup>st</sup> Street and Westown Parkway, should warrants be met someday. She noted the proposed rezoning on the Penta Partners property for the construction of a coffee shop will generate less traffic than was projected under its current professional commerce park zoning. The City typically does not pay for traffic signals for non-

February 19, 2019

residential properties, so it would likely need to be paid for by the property owners surrounding the intersection.

Chris Costa, Knapp Properties, 5000 Westown Parkway, Suite 400, reported they met with Penta Partners to discuss their concerns with the proposed rezoning. Knapp Properties had concerns about the location of the cross access driveway, as the plans shown indicated it would enter their property in the middle of the parking lot, which would conflict with their plans to construct another office building on the site. Knapp Properties had suggested to Penta Partners that the cross access driveway be located further to the south end of the parking lot, and Penta Partners was agreeable to that. He stated Knapp Properties does not currently desire traffic signals to be constructed at 71<sup>st</sup> Street and Westown Parkway, so they do not want to bear the financial responsibility associated with them. Since Knapp Properties considers the traffic signals to be an unresolved issue, they have concerns about this rezoning being approved tonight.

Mayor Gaer stated if the Penta Partners development is projected to generate less traffic under the proposed rezoning, he doesn't believe this item should be delayed over questions about the need for traffic signals.

Council member Trimble inquired about who should be financially responsible for the traffic signals when they are needed.

Brian Hemesath, City Engineer, reported the staff perspective is there is no urgency to install traffic signals at 71<sup>st</sup> Street and Westown Parkway, because the intersection is far from meeting the warrants to do so. He noted traffic signal assessments have typically assigned responsibility to the property owners at each of the four corners.

City Attorney Dick Scieszinski stated the City would have the right to assess all properties within a larger area determined by a traffic study's findings for which properties generate traffic through the intersection.

Council member Trimble inquired, if the Council only approved the second reading tonight and delayed the third reading to the March 4<sup>th</sup> meeting, would that be detrimental to this development project.

Travis Sisson, Penta Partners, 5700 University Avenue, stated a two-week delay of the third reading would be problematic to the timing of this project. He also stated he doesn't know what could be accomplished by a two-week delay, as the proposed development is actually going to decrease the projected traffic generated by their property. He stated they would be willing to locate the cross-access driveway wherever it would be agreeable to Knapp Properties.

The Council members held discussion on the potential future need for traffic signals at 71<sup>st</sup> Street and Westown Parkway and which parties should bear the financial responsibility to construct them. They expressed a desire that when traffic signals are deemed warranted at that intersection,

February 19, 2019

the City shall conduct a traffic study to determine which properties are generating traffic through the intersection, as those properties should bear the financial responsibility. It was noted that the City may bear some of the financial responsibility if the traffic study finds that a significant amount of the traffic through that intersection is general city traffic not associated with any of the properties in that area.

Jim Gocke, Penta Partners, 5700 University Avenue, stated since their property currently does not have a cross-access driveway to the Knapp property, it would not have access to a traffic signal at 71<sup>st</sup> Street and Westown Parkway if it were built today. He stated if a future traffic study shows that their property is generating traffic through that intersection, they would be willing to pay their share for the traffic signals.

It was moved by Trevillyan, second by Hardman to consider the second reading of the ordinance.

Vote 19-070: Hardman, Mickelson, Sandager, Trevillyan, Trimble...5 yes

On Item 7(c) South 33rd Street and Fuller Road Retaining Wall Improvements - Approval of Fuller Road Wall Agreement, initiated by Benton A. Yost and Heather N. Yost

Brian Hemesath, City Engineer, reported the City discovered a couple years ago that the wall was failing, so a consultant was hired to inspect the structure and make recommendations. The three options recommended by the consultant were: grade the slope back, construct a stepped retaining wall, or construct a larger cantilever concrete retaining wall. The three options were discussed at a meeting of the Public Services Subcommittee, and they recommended staff look into the grading option. Staff met with the three affected property owners, and the two west of South 33<sup>rd</sup> Street agreed to the grading option. The Yost family, which owns the property east of South 33<sup>rd</sup> Street, has negotiated an agreement to construct a stepped retaining wall.

Council member Trevillyan spoke in opposition to the proposed agreement because the stepped retaining wall option has a significantly higher cost than the grading option. He also stated this project is entirely within the roadway easement, so the City has the authority to select whichever option it considers to be in its best interest. He expressed concerns that, even though the current property owners are agreeing to own the retaining wall, a future property owner may be unwilling or unable to pay for necessary repairs or replacement of the retaining wall when it fails, and the City may end up having to pay for it.

Council member Sandager spoke in favor of the proposed agreement, stating the current failure of the retaining wall is the City's responsibility, and the property owners would have preferred to retain their level yard with the cantilever concrete retaining wall. However, they have agreed to a compromise with the stepped retaining wall, which costs significantly less than the cantilever concrete retaining wall option. He also stated any future property owner requesting that the City pay for necessary repairs or replacement of the retaining wall would not have a legal leg to stand on.

It was moved by Sandager, second by Trimble to adopt Resolution - Approval of Agreement.

Council member Hardman stated she visited the property and met with the property owners, and she expressed support for the proposed agreement, as she believes the City and the property owners have worked out a successful compromise.

On Item 8 - Receive, File and/or Refer: no items

February 19, 2019

On Item 9(a) Legislative Updates

Jamie Letzring, Deputy City Manager, reported on the following bills:

- HSB 165 regarding property tax reform: This complicated bill would affect many components of city government, including establishing a cap on general fund property tax revenue and a cap on city general fund reserve balances at 25 percent. This does not yet have a companion bill in the Senate. Staff will continue to monitor this evolving legislation, and will likely recommend that the City register as opposed.
- SSB 1095 regarding city authority over municipal utility boards: This bill would remove the Mayor/City Council authority to remove utility board members. It has passed out of the senate subcommittee, but the senators stated it would need to be amended before moving forward. The City is registered as opposed to this bill.
- HSB 2 regarding alternative project procurement method: This bill would offer flexibility for city projects, which is desired since the lease-purchase option has been removed for cities. The City is registered in favor of this bill.
- HSB 100 regarding lawful preexisting non-conforming ordinances: This bill would prohibit cities from adopting ordinances that infringes on a property owner's non-conforming use unless that use poses a threat or is abandoned. Staff will review this bill further to determine if the City should have a position on it.

The meeting was adjourned at 6:52 p.m.

Respectfully submitted,
